

Email Archiving Facilitates Regulatory Compliance

Integrated into our **Email Security Gateway Powered by SpammerTrap®**, the email archiving feature promotes compliance with corporate policies and government regulations, such as SOX, HIPAA and GLBA. Archiving enables email records to be protected from inadvertent or deliberate deletion, and easily retrieved using specific search criteria.

Organizations dealing in contracts, external work projects, and mid- to long-term account relationships can preserve important communications—and ensure ongoing compliance—by using email archiving.

All These Features - Standard

- Flexible archiving of both Incoming and Outgoing mail in accordance with company policies
- Unlimited email retention time, integrated to client disk space
- Controlled access to archiving functionality—currently limited to client site administrators to preserve security
- Retrieval of archived messages via simple query screen, with options to search by sender, recipient, subject or date range or any combination
- Messages may be reviewed individually, then resent to original recipient or an alternate address, or downloaded
- Robust reporting options
 - Summary Report lists header information for each email that meets search criteria
 - Compressed Report includes all actual email messages meeting search criteria
 - Reports may be viewed online or via link
- Easy administrator set-up with intuitive screens (see reverse side), plus 24/7 support.

Benefits of Email Archiving

- *Protects important communications from being deleted accidentally*
- *Safeguards messages against deliberate deletion, alteration, or sabotage*
- *Preserves message integrity for legal, financial and other purposes*
- *Ensures easy retrieval of email records using specific search criteria*
- *Facilitates compliance with corporate policies and government regulations*
- *Enhances overall email security*

Email archiving is available with all ENT and GEM models, integrated in the appliance with no additional hardware required.

Taking Email Security to the Next Level

SECNAP continues to raise the standard for email security—this time, with integrated archiving functionality that preserves the integrity of your email communications for as long as you need.
