

When was the last time you looked at your **Email Security Solution** and felt **happy?**

It's not a trick question. In a recent study, almost 50% of businesses reported they are less than satisfied with their email security solution. Users are knee-deep in junk mail, and IT guys are ready to go postal. It's ugly out there.

Wouldn't you like to end the pain, and start the New Year in a happier place?

Well, you can, because

Happiness is...

A Warm Appliance	Service in the Cloud
Get your appliance hardware free with purchase of a support plan	Get 3 additional months free for each year of hosted service you buy
Includes software updates, maintenance, 24/7 support	No hardware to purchase, no capital expense, no strain on resources
Offer good to March 31, 2011	Offer good to March 31, 2011

"I have called your client references, and I have to tell you... I am impressed. I'm glad you came along when you did, just before I went with an IronPort device. Your spam solution does more for about the same money."

—Amanda Miller, VP Information Technology, 1st United Bank

With SECNAP Email Security you get:

- 99.999% spam-filtering accuracy
- Easy scalability, up and down
- Ability to grow your business
- No additional resources required
- 20-minute set-up
- Transparent to users
- Robust statistical reporting
- Content filtering, encryption and more

"With SpammerTrap we typically see 99.99% accuracy in spam detection with few false positives. We had previously used the Symantec solution, but regardless of how much we tuned the setup, we couldn't get anywhere near the same accuracy."

*—Steve Davila, Network Manager
Winterthur Museum*
