

SpammerTrap

Email Security Solution

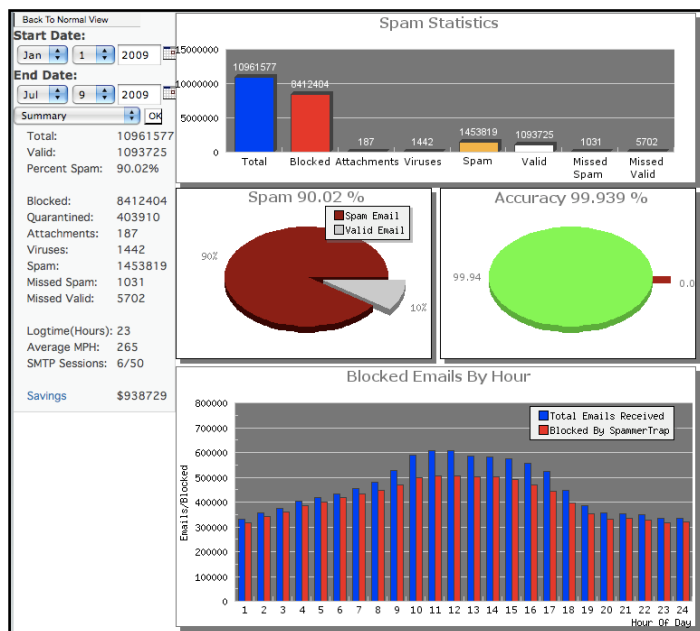

For Small and Midsize Enterprises

The Next Generation of Email Security

SECNAP® technology leads the industry in delivering legitimate mail at lightning speed while blocking spam, mail-borne viruses, and other malware. Dubbed **The King of Spam Filters** by *SC Magazine*, the SpammerTrap® Email Security solution combines advanced technology with exceptional cost-effectiveness to offer the best price-to-value ratio in the industry.

Features & Benefits of SpammerTrap SME Appliances

- **Award-winning protection.** Anti-spam, anti-virus, anti-malware all in one box.
- **Ease of use.** Simple 20-minute install. No ongoing administrator maintenance. *SC Magazine* awarded five stars for ease of use and customer support, and *Processor* cited “remarkably easy set up.”
- **Universality and scalability.** Integrates with all popular email platforms, including MS Exchange, Novell GroupWise and Lotus Notes. Seven SpammerTrap models, plus a hosted solution, provide complete scalability.
- **Bandwidth conservation.** Self-contained appliance installs in front of the server, requiring no client server resources and blocking malware before it reaches the client network.
- **Immediate and dramatic results.** In most cases, clients recoup their investment in the first two months.
- **Round-the-clock service.** Supported 24/7 by expert SECNAP engineers committed to quality and innovation.
- **Robust reporting.** Unique array of reports helps IT managers and system administrators monitor performance.
- **Encryption.** Enables email messages to travel safely over the Internet, protected from cybercriminals, and also facilitates compliance with federal regulations.
- **Content filtering.** Enables administrators to monitor inbound or outbound email with unrivaled flexibility. Supports corporate policies as well as regulatory requirements.

Accuracy Consistently Exceeds 99.9%

SpammerTrap delivers **99.9% accuracy** around the clock so that clients enjoy economical, highly efficient protection and total peace of mind.

The robust reporting feature allows administrators to monitor their volumes of email and spam. Pie charts display the percentages of valid email received and total spam blocked, as well as the spam filtering accuracy rate. Bar charts display actual volumes of email and spam for a given period.

In this example, over a six-month period:

- Almost 11 million emails were received
- More than 90% were spam
- The spam filtering accuracy rate was 99.939%.

SME Product Technical Information

Appliance Features	SME-150	SME-500
Optimal Email Users Supported	150	500
Optimal Email Addresses Supported	300	1,000
Rack Mount	1U	1U
GB Log/Quarantine	50GB	50GB
CPU	P4D	Core2Duo
Ethernet	1GB	Dual 1GB
Clustering Available	No	Yes
