

When you're Serious about Security

The Next Generation of Information Security

SECNAP® Network Security protects organizations from becoming victims of cybercrime through a unique, layered portfolio of patented security solutions and exceptional technical expertise.

In fact, our technological excellence has earned widespread industry recognition, including:

- **Shaping Information Security** award sponsored by 2008 Info Security Products Guide
- **Hot Company** awards for 2009 and 2008 presented at Technosium World Executive Alliance
- **2009 Tomorrow's Technology Today Award for Email Security** presented by Info Security Products Guide
- **MVP Award for Technology Leadership** in 2008 sponsored by Network Products Guide.

Leveraging our comprehensive security portfolio, network and IT managers are able to dramatically reduce vulnerabilities while substantially improving their compliance positions. SECNAP offers a full complement of advanced security solutions designed to effectively protect your network, email, and information assets from cybercrime—today and tomorrow.

Email Security

Our next-generation SpammerTrap® Email Security solution leads the industry in delivering legitimate email at lightning speed while blocking or quarantining spam, viruses and other malware with accuracy that consistently exceeds 99.9%, thanks to patented SECNAP security technology.

Available as an appliance or hosted service to meet the requirements of global enterprises and small businesses, this full-function solution provides anti-spam, anti-virus, anti-malware protection and more in one smart box. So smart, in fact, that it won the *2009 Global Product Excellence* award sponsored by the Info Security Products Guide. It was also named a *Hot Product* by CRN Magazine and dubbed *The King of Spam Filters* by SC Magazine in 2008.

Encryption, content filtering and archiving, an advanced email firewall, and other proprietary technology keep this solution way ahead of the pack.

Network Security

As a premier provider of managed network security and intrusion detection and prevention services, SECNAP is a trusted advisor to clients in a broad range of industries, from finance and education to e-tailing and manufacturing, and well beyond.

SECNAP integrates four proprietary components for a rock-solid solution that delivers superior network security:

- Patented HackerTrap™ Intrusion Detection and Prevention software
- Edge Attack Sensor Network
- Patented SmartAlert™ Filter
- Network Security SWAT Team

As a result, we're able to provide more efficient, cost-effective protection than any other Managed Network Security Services provider.

Security Services

Cybercrime is relentless, and all networks are vulnerable. The vital first step in protecting your network, web applications, and information assets is to identify the security risks that could affect them.

We provide a variety of services to do just that, with deliverables that include detailed reports, prioritized risks and remediation instructions.

- External Penetration Tests
- Security Health Checks
- Web App and Wi-Fi Assessments
- Network and IT Security Audits
- Social Engineering Tests
- Regulatory Compliance Audits (HIPAA, SOX, FFIEC, GLBA, FACTA, ISO and others)

With SECNAP you also receive 24/7 support from security experts who possess extensive, hands-on experience in combating cybercrime and working with the latest security technologies—so that you don't have to. But there's no need to take our word for it. Ask any of our clients. References on request.
