

Virtual Private SpammerTrap

Efficient, Effective Email Security in the Cloud

SECNAP® technology leads the industry in delivering legitimate mail at lightning speed while blocking mail-borne viruses, spam and other malware. Dubbed **The King of Spam Filters** by *SC Magazine*, the SpammerTrap® Email Security solution combines advanced technology with exceptional cost-effectiveness to offer the best price-to-value ratio in the industry.

Features & Benefits

- **Award-winning protection.** Anti-spam, anti-virus, anti-malware all in one solution—no add-ons necessary.
- **Ease of use.** Simple 20-minute start-up with no ongoing administrator maintenance. *SC Magazine* awarded five stars for ease of use and customer support, and *Processor* cited “remarkably easy set-up.”
- **Universality and scalability.** Integrates with all popular email platforms. Standard and Premier VPS hosted solutions offer eight tiers to accommodate user populations of all sizes and provide complete scalability.
- **Bandwidth conservation.** No client server resources required. Malware is blocked in the cloud, before it reaches the client network.
- **Immediate and dramatic results.** In most cases, clients recoup their investment within weeks.
- **Round-the-clock service.** Supported 24/7 by expert SECNAP engineers committed to quality and innovation.
- **Robust reporting.** Unique array of reports helps IT managers and system administrators monitor performance.
- **Encryption.** Enables inbound and outbound email messages to travel safely over the Internet. Facilitates compliance with federal regulations (such as HIPAA, HITECH, GLBA, SOX and others) as well as corporate policies.
- **Email archiving.** Optional inbound and outbound email archiving available with *Premier VPS*.
- **Content filtering.** Enables administrators to monitor inbound email with unrivaled flexibility. *Premier VPS* includes content filtering for outbound emails as well.
- **Other features.** Outbound smart host; inbound spam filtering; inbound and outbound virus and attachment filtering; advanced backscatter protection. *Premier VPS* also features spam filtering for outbound emails.

Accuracy Consistently Exceeds 99.9%

SpammerTrap delivers **99.9% accuracy** around the clock so that clients enjoy economical, highly efficient protection and total peace of mind.

The robust reporting feature allows administrators to monitor their volumes of email and spam. Pie charts display the percentages of valid email received and total spam blocked, as well as the spam filtering accuracy rate. Bar charts display actual volumes of email and spam for a given period.

In this example, over a five-month period:

- Almost 14 million emails were received
- More than 88% were spam
- The spam filtering accuracy rate was 99.991%.
